Skills

Technical

</> Backend
Java, Spring Boot, Hibernate, JPA

📊 Queues
RabbitMQ, Kafka

</> Frontend
JavaScrips, Angualr 6, Reactjs, Vue-js, jQuery, HTML, CSS

🗄 Data base
MySql, Postgrey, Solr

🏢 Architecture
Micro Services, Monolathic, Rest APIs

📄 IDE
Eclipse, Visual studio, intellij

Work Experince

07/22- Present

💼 Foundit (Formerly Monster APAC & ME)
Tech Lead

1. Outreach   👥 8+

Outreach is structured to facilitate communication between recruiters and job seekers through email, considering the recruiter's current inventory. The project incorporates notable features such as AI-powered email content generation, personalized emails tailored for seekers, and the inclusion of employer branding in recruiter communications.

Technologies - Java8, SpringBoot, Hibernate, ReactJS, MySQL, MongoDB, RabbitMQ, Kafka
Architecture - Micro services

2. Inventory   👥 8+

The Inventory module is designed to automatically consume and calculate daily, monthly, and remaining inventory for recruiters based on a zero-login parent-child relationship. This project enables downstream projects to take action based on available inventory, such as profile views, profile Excel downloads, resume searches, and outreach activities.

Technologies - Java8, SpringBoot, Hibernate, MySQL, RabbitMQ
Architecture - Micro services

3. Recruiter Actions   👥 5+

This project manages all recruiter actions, including viewing profiles, downloading profiles, marking profiles as favorites, and moving profiles through different stages of the hiring funnel.

Technologies - Java8, SpringBoot, Hibernate, ReactJS, MySQL, RabbitMQ
Architecture - Micro services

4. Profile and Job applies sync   👥 5+

This project facilitates synchronization between seeker profiles and job applications with the recruiter platform, handling high throughput and critical business logic seamlessly.

Technologies - Java8, SpringBoot, Hibernate, MySQL, Kafka
Architecture - Micro services

07/21- 07/22

💼 Cognizant
Software Engineer

1. Discover   👥 8+

Compare and apply for the best Discover credit card for the customer

Technologies - Java, MySQL, ReactJS
Architecture - Monolithic

10/20- 06/21

💼 **EzCred**
Software Engineer

1. EzCred 👥 10+

Enable EMI Financing for Offline and Online Customer Experiences

Technologies - Java, Hibernate, Dropwizard, MySql, Vue-js
Architecture - Micro services

04/20- 10/20

💼 **Talentica Software**
Software Engineer

1. Tala Security 👥 12+

Based on CSP Policy, CSP makes it possible for server administrators to reduce or eliminate the vectors by which XSS can occur by specifying the domains that the browser should consider to be valid sources of executable scripts.

Technologies - Java, Spark, Postgrey, Reactjs, Nodejs
Architecture - Micro services

11/19- 04/20

💼 **Magicbricks, Bangalore**
Software Engineer

1. PG 👥 6+

Helps user to find PGs in a city based on applied filter. It also helps to see all the details for PG which includes aminities, similar PGs near by and more PGs by same owner.

Technologies - Java, Spring Boot, MySql, Hibernate, Solr, JSP, JavaScript, jQuery
Architecture - Micro services

2. Plot 👥 6+

Shows all the details of a corridor which includes MVP of corridor, top localities, top agent, exclusive coverage, trending plots and more investment corridors.

Technologies - Java, Spring Boot, MySql, Hibernate, Solr, JSP, JavaScript, jQuery
Architecture - Micro services

12/17- 10/19

💼 **GIZBEL Technology, Bangalore**
Software Engineer

1. Docket Review 👥 6+

Tool where analytics is done based on docket status and feedback given by a reviewer team in form of file upload, comments which helps attorney to make further decision on docket.

Technologies - Java, Spring , MySql, Hibernate, JSP, JavaScript, jQuery, BootStrap
Architecture - Monolothic

2. Annuity Review 👥 6+

Tool which helps attorney to analyse business status of a docket where reviewer team helps attorney to take next decision.

Technologies - Java, Spring , MySql, Hibernate, JSP, JavaScript, jQuery, BootStrap
Architecture - Monolothic

3. Portfolio 👥 5+

Based on keyword tool genrates protfolio of docket / docket family / patents.

Technologies - Java, Spring , MySql, Hibernate, JSP, JavaScript, jQuery, BootStrap
Architecture - Monolothic

4. Trademark 👥 5+

To track 3rd party patents.

Technologies - Nodejs, Express , MySql, Sequlize, Angular 6, BootStrap
Architecture - Monolothic

Education

08/13- 04/17

🎓 **B.Tech - National Institute Of Technology, Delhi**
Branch - Electronics and Communication
CGPA - 7.13

2011- 2012

🏫 **12th - Yadav Public School, Jodhpur**
Science maths
Percentage - 83.60%

2009- 2010

🏫 **10th - Adarsh Vidya Mandir, Jaitaran**
Percentage - 79%

GIT projects

09/17– Persent

Sunil Vaishnav
GIT projects

1. Delivery Management System

Delivery task tool is completely real time action tool, where Admin can add new task, see added task history and cancel a task. User can accept a high priority task, can take action on accepted task and can see the accepted task list.

Technologies - Java, Web socket, Spring, Hibernate, JavaScript, jQuery, MySql

2. Inventory Management System

Inventory menagment system helps shopkeeper to manage his/her shop.Tool includes analysis of stock, notify about upcoming deliveries, customer data and billing system.

Technologies - Java, Spring Boot, Hibernate, Reactjs, MySql, Micro services

3. Quiz

Multiple choice questions Show correct and wrong answer after completing of quiz Show user score card after result User can't skip any question without answering If user skip any question, result won't be seen to user.

Technologies - Angular 6,SCSS,browser local storage

4. Editor

Three level child parent relationship, add text editor in 3rd child.

Technologies - Angular 6,SCSS,browser local storage
