Work Experince

07/22- Present	**💼 Foundit (Formerly Monster APAC & ME)** Tech Lead **1. Outreach** 👥 8+ Outreach is structured to facilitate communication between recruiters and job seekers through email, considering the recruiter's current inventory. The project incorporates notable features such as AI-powered email content generation, personalized emails tailored for seekers, and the inclusion of employer branding in recruiter communications. **Technologies -** Java8, SpringBoot, Hibernate, ReactJS, MySQL, MongoDB, RabbitMQ, Kafka **Architecture -** Micro services **2. Inventory** 👥 8+ The Inventory module is designed to automatically consume and calculate daily, monthly, and remaining inventory for recruiters based on a zero-login parent-child relationship. This project enables downstream projects to take action based on available inventory, such as profile views, profile Excel downloads, resume searches, and outreach activities. **Technologies -** Java8, SpringBoot, Hibernate, MySQL, RabbitMQ **Architecture -** Micro services **3. Recruiter Actions** 👥 5+ This project manages all recruiter actions, including viewing profiles, downloading profiles, marking profiles as favorites, and moving profiles through different stages of the hiring funnel. **Technologies -** Java8, SpringBoot, Hibernate, ReactJS, MySQL, RabbitMQ **Architecture -** Micro services **4. Profile and Job applies sync** 👥 5+ This project facilitates synchronization between seeker profiles and job applications with the recruiter platform, handling high throughput and critical business logic seamlessly. **Technologies -** Java8, SpringBoot, Hibernate, MySQL, Kafka **Architecture -** Micro services
